Trip training.

Bowel training.

Intensive training.

Night-time training.

Registration is required, space is limited

Ashley Hickey is a potty training specialist. She has been working with children with special needs for more than 10 years. In 2001 she started teaching an inclusive Toddler classroom and was clinically trained in ABA at the Emory Autism Center at Emory University in Atlanta, GA and after the birth of her first child continued there as a family consultant. A move to CT resulted in the birth of Successful Potty Training www.successfulpottytraining.net. Ashley is passionate about helping families with this necessary life skill and with the help of her ABA training has successfully potty trained hundreds of children. Although Autism Spectrum Disorders are her specialty, she has potty trained children with developmental delays, visual impairments, Cerebral Palsy, Down syndrome and Prader Willi syndrome, ranging in age from 2 to 14 and across many states.

Ashley's goal is to give parents hope for their child to be included in school and the community, to live as independently as possible and to be accepted.
