

CONSERVATORSHIP, GUARDIANSHIP, SUPPORTED DECISION MAKING

When a child with disabilities approaches age 18, parents and caregivers often find themselves surprised and overwhelmed to learn that they will soon lose the legal right to manage their child's affairs or make key medical and financial decisions on the child's behalf. Special Needs Planning is critical to ensure that parents can stay in control, and access key benefits/resources that will be necessary to ensure a smooth transition into adulthood and beyond.

In this workshop, you will learn how to navigate the complicated world of special needs planning and cover a number of topics:

- Guardianship
- Conservatorship
- Power of Attorney
- Supported Decision-Making
- Estate Planning and Financial Considerations
- And more!
